Tin	0.6	1.2
Titanium	0.6	1.2
Vanadium	4.0	8.0
Zinc	1.2	.20

**The permittee shall inspect each tributary dental facility at least once every five years to verify compliance with the wastewater treatment operation, maintenance, and notification elements of 6NYCRR Part 374.4. Inspection and /or outreach to other industrial/commercial sectors which may contribute mercury is also recommended. All new or increased tributary discharges, including hauled wastes, which are from sources that are industrial in nature must be evaluated for mercury content and if levels exceed 500ng/l then authorization must be obtained from the Department prior to acceptance. A file shall be maintained containing the notices submitted by dental offices and all other pertinent information. This file shall be available for review by DEC representatives and copies shall be provided upon request. Note that a permit modification may be necessary to include more stringent requirement for POTWs which do not maintain low mercury effluent levels.

139-80. Mass—discharge-based limitations.

Substance	Allowable Influent Loading Average Daily (pounds per day)
Aluminum	0.500

Antimony	0.330
Arsenic	0.167
